The numbering of the newly presented claims (i.e. 7-27) in the amendment filed March 30, 2000 is not in accordance with 37 CFR 1.126 because only claims 1-5 were previously present in this application. Accordingly, claims 7-27 have been renumbered as claims 6-26, respectively, in accordance with 37 CFR 1.126.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6-14, drawn to a polymeric product, classified in class 520, subclass 1+.
- II. Claims 15-18 and 23-26, drawn to a method for absorbing oil and organic solvents from a body of water, classified in class 210, subclass 693.
- III. Claims 19-22, drawn to a method for making a polymeric product, classified in class 264, subclass 145.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Group I could be used in another process, different from that of Group II. For

Art Unit: 1724

example, this material could be used to manufacture containers, toys, packaging material, insulating material, etc.

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of Group I could be made in another manner, different from that of Group III. For example, this polymeric material could be cross-linked with a material (e.g. divinylbenzene) other than 1,4-diethylcromethyl-2,5-dimethylbenzene in a chlorinated hydrocarbon solvent in the presence of titanium tetrachloride.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
